Coronavirus 1030 update: One case traveled to Rotorua while symptomatic

H

★ Sequence this - she's the case vector.

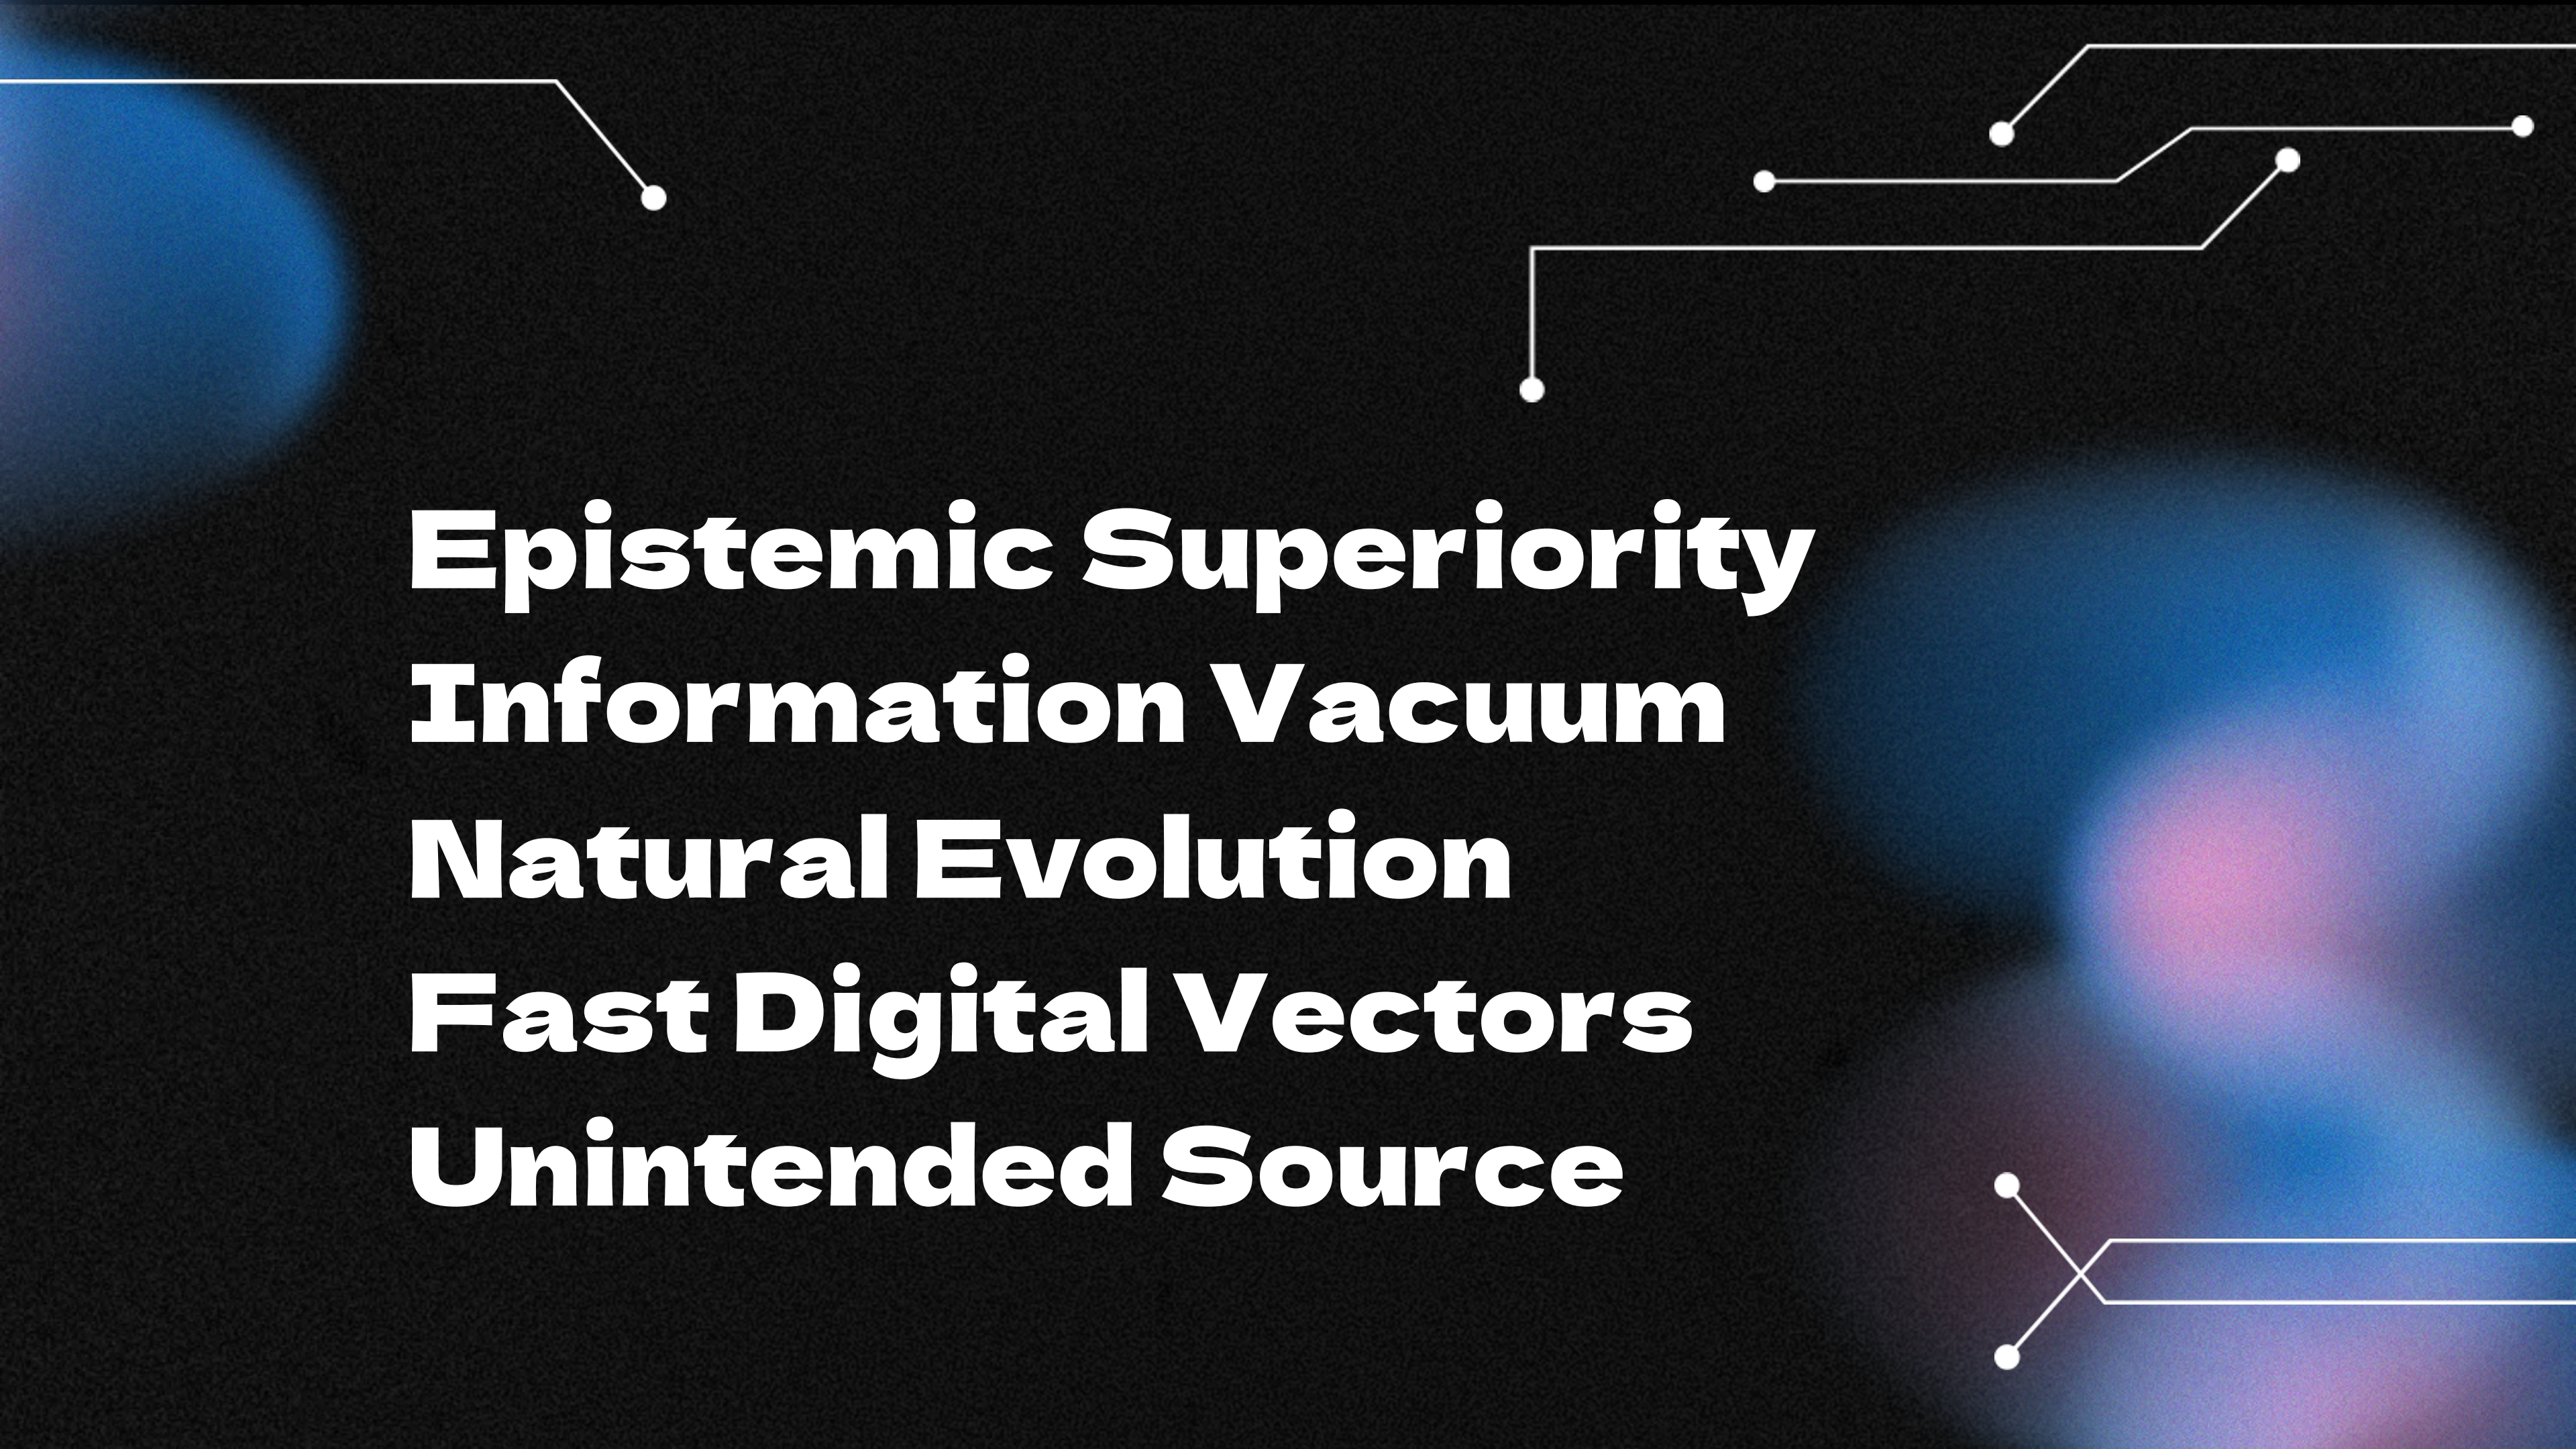

1. A guy arrives from Aus on 30th July, tests negative in managed iso on day 2, Texts up This "girl in her 20s" and she starts sneaking into his managed iso facility (Grand Millenium) for roots
2. She gets symptomatic, infects her father and mother sometime last week.
3. Media release yesterday morning that the guy in his 20s (arrived from Melbourne on the 30th) is positive on the day 12 test <https://www.health.govt.nz/news-media/media-releases/1-new-case-covid-19-18>
4. Girl's dad decides to get tested. - Positive. Doesn't know how he got infected. Rest of the family test positive too.
5. Girl refuses to admit it all in initial MoH interviewing, but the police have figured it out anyway.
6. We are now all in lockdown because of 3 things - 1. This dickhead from Melbourne, 2. This dickhead chick, 3. The iso facility letting people sneak in.

EDIT - I know this via my friend who went to uni with the girl at UoA. All the group chats etc have blown up, she wont go on record owning up to it though, as she'd basically be run out of the country.

No I don't know her name and i'd get banned posting it even if i did.
